MUHAMMAD RIZWAN

Full Stack Developer

Rawalpindi, Pakistan | +92 342 7524477 | Rizwanchaudhary4477@gmail.com | Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience building production web applications using the MERN/MEAN stack and Next.js, plus desktop applications in C# / WPF. Skilled in designing RESTful APIs, relational and NoSQL database architecture, and end-to-end deployment including cPanel and shared hosting. Built and shipped live applications including e-commerce, education, and AI-powered support platforms. Looking to bring strong full-stack and problem-solving skills to a growing engineering team.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6), TypeScript, Tailwind CSS, Bootstrap, HTML5/CSS3

Backend: Node.js, Express.js, NestJS, RESTful API Design, API Integration

Databases: MongoDB, PostgreSQL, MySQL, SQLite, Entity Framework Core

Desktop / Other: C#, WPF, XAML, ML.NET

Mobile: React Native

Tools & Practices: Git, GitHub, Postman, JSON, Code Review, Agile collaboration

WORK EXPERIENCE

Full Stack Developer: Primze Tech *Nov 2025 – Present*

- Design, develop, and maintain scalable web applications using React.js, Next.js, Node.js, Express.js, MongoDB, and PostgreSQL.
- Build and integrate RESTful APIs across frontend and backend, covering both feature development and database design.
- Work with C#, SQL, and SQLite alongside the web stack to deliver cross-platform solutions.
- Deploy and maintain applications in production environments, following established coding standards and code review practices.

MERN Stack Developer: Slyk Design Studio *Nov 2024 – Oct 2025*

- Developed and maintained scalable web applications using MongoDB, Express.js, React.js, Node.js, Next.js, TypeScript, and PostgreSQL.
- Designed and implemented RESTful APIs and responsive, user-friendly interfaces for multiple client projects.
- Optimized database operations and application performance, contributing to improved load times and stability.
- Collaborated closely with the development team to deliver features on schedule and resolve production issues.

MERN Stack Developer (Internship): Alright Private Tech Limited *Aug 2023 – Dec 2023*

- Built and integrated REST APIs and developed responsive UI components using the MERN stack.
- Managed database operations and collaborated with the team to debug issues and implement new features.

KEY PROJECTS

Hospital Cafe Ledger: Desktop Cafe Management System |
https://github.com/chaudharyrizwan1876/HospitalCafeLedger

- Built a full offline desktop application in C#, WPF, and SQLite (Entity Framework Core) for hospital cafe management, including doctor accounts, real-time billing, and a wallet-based payment system.
- Integrated ML.NET for sales forecasting, balance warnings, and peak-hour detection; added CSV report export and database backup/restore. The application runs on Windows with no installation required.

E-Commerce Web Application | https://rizwansshoppingstore.netlify.app/

- Built a full-stack store with React, Node.js, Express, and MongoDB, including JWT authentication, product/order management, Stripe payments, and Cloudinary image handling.
- Deployed frontend on Vercel and backend on Render with an automated deployment workflow.

UniJump: International Education Platform | https://www.unijump.es/

- Built a Next.js + MongoDB platform with dynamic admin and client dashboards for international student applications.
- Implemented document uploads, status tracking, and approval workflows for admins managing submissions and payments.

AI Email Support Tool | https://new.joaomiranda.com/ai-support/

- Built an AI-powered support system (React, Node.js, MongoDB) with IMAP email fetching, OpenAI-generated replies, and SMTP sending via Nodemailer.
- Implemented role-based JWT authentication for Admin and Employee users; deployed on cPanel.

Nexus: Investor & Entrepreneur Collaboration Platform | https://nexus-iota-five.vercel.app/

- Developed a full-stack platform (Next.js, Node.js, Express, MongoDB) connecting investors and entrepreneurs through startup showcases and secure communication.

EDUCATION

BS Computer Science: PMAS Arid Agriculture University, Rawalpindi *Oct 2020 – Aug 2024*

CGPA: 3.24 | Final Year Project: "Lingo Learn with AI", an Android language-learning app (Kotlin, XML) with real-time chat, culture modules, and quizzes.

COURSES & CERTIFICATIONS

- Web Development: Coursera, offered by Vanderbilt University
- MERN Stack Development: Apna College
