ABOUT ME

I hold a Bachelor's degree in Computer Science from PMAS Arid Agriculture University Rawalpindi. I am a passionate and dedicated Full Stack Developer with experience in MERN Stack development and modern web technologies including React.js, Next.js, NestJS, Node.js, Express.js, MongoDB, and PostgreSQL. I possess strong technical knowledge along with excellent problem-solving and interpersonal skills, enabling me to collaborate effectively with clients and teams. I have a logical and programmatic approach to solving complex problems and a strong commitment to delivering high-quality solutions. I am eager to continuously learn, grow, and enhance my skills while contributing to the success and growth of an organization through innovative and efficient development practices.

EDUCATION AND TRAINING

05/10/2020 – 18/08/2024 Rawalpindi, Pakistan
BS COMPUTER SCIENCE PMAS ARID Agrculture University

My final year project was an Android mobile application in which I used **XML** for the **frontend** and **Kotlin** for the **backend.** Project based on language translator which has many features such as translating from one language to another, real time chat room, Culture of languages and quiz system

SKILLS

React Js | Next Js | Node Js | Express Js | MongoDB | Git | Github | MySQL | Postgresql | Postman | Bootstrap | Javascript | Tailwind CSS | JSON | TypeScript | Nest.Js | RESTful api | Code Review | Web Development | Web API | API Integrations

WORK EXPERIENCE

FULL STACK DEVELOPER – PRIMZE TECH – 01/11/2025 – Current – ISLAMABAD, PAKISTAN

Email: support@primzetech.com | **Website:** https://www.primzetech.com/

I am currently working as a Full Stack Developer, where I am responsible for designing, developing, and maintaining scalable web applications. I work with modern technologies including React.js, Next.js, Node.js, Express.js, MongoDB, and PostgreSQL, C#, SQL and SQL lite to build efficient and high-performance solutions. My role involves both frontend and backend development, API integration, database design, and deploying applications in production environments while following best coding practices.

MERN STACK DEVELOPER – SLYK DESIGN STUDIO – 01/11/2024 – 01/10/2025 – RAWALPINDI, PAKISTAN

I am currently working at **Slyk Design Studio** as a **Full Stack (MERN) Developer**. In this role, I develop and maintain scalable web applications using technologies such as **MongoDB, Express.js, React.js, Node.js, Next.js, TypeScript, and PostgreSQL**. My responsibilities include designing and implementing RESTful APIs, building responsive and user-friendly interfaces, managing and optimizing database operations, and ensuring overall application performance and scalability. I also collaborate closely with the development team to deliver high-quality features, troubleshoot issues, and continuously improve the product.

MERN STACK DEVELOPER – ALRIGHT PRIVATE TECH LIMITED – 01/08/2023 – 01/12/2023 – RAWALPINDI, PAKISTAN

I have completed an **internship at Alright Private Tech Limited as a MERN Stack Developer**. During this internship, I worked on developing web applications using **MongoDB, Express.js, React.js, and Node.js**. My main responsibilities included building and integrating APIs, developing responsive user interfaces, and managing database operations. I also collaborated with the development team to debug issues, improve application performance, and implement new features.

PROJECTS

Cafe Management System

Developed a full-stack desktop application for hospital cafe management using C#, WPF, and SQLite with Entity Framework Core. Built features including doctor account management, real-time billing and order tracking, a wallet-based payment system, monthly reports with CSV export, and database backup and restore. Integrated ML.NET for AI-powered predictions including sales forecasting, doctor balance warnings, item trend analysis, and peak hour detection. The application runs fully offline on any Windows machine with no installation required.

E-Commerce Web Application

Developed a full-stack e-commerce platform using React, Node.js, Express.js, and MongoDB with secure JWT authentication, product and order management, Stripe payment integration, and Cloudinary image handling. Deployed the frontend on Vercel and backend on Render with automated deployment workflows.

UniJump (International Education Platform)

Built a full-stack education platform using Next.js and MongoDB with dynamic admin and client dashboards. Implemented student applications with document uploads, status tracking, and approval workflows, while admins manage submissions, payments, and application processing through a centralized system.

Link https://www.unijump.es/

AI Email Support Tool

Built an AI-powered email support system using React, Node.js, and MongoDB with IMAP integration for automatic email fetching, AI-generated replies using OpenAI API, and SMTP-based email sending via Nodemailer. Implemented role-based authentication (Admin & Employee) using JWT and deployed the frontend on Netlify and backend on Render.
