ICS

Punjab Group of Colleges [05/05/2018 – 08/08/2020]

City: Bhakkar | **Country:** Pakistan | **Field(s) of study:** Computer Science | **Final grade:** A+

Matric

Allied School [03/04/2016 – 04/09/2018]

City: Bhakkar | **Field(s) of study:** Computer Science | **Final grade:** A+

WORK EXPERIENCE

Alright Private Tech Limited – Rawalpindi, Pakistan

MERN Stack Developer

I have completed a **3-month internship at Alright Private Tech Limited as a MERN Stack Developer**. During this internship, I worked on developing web applications using **MongoDB, Express.js, React.js, and Node.js**. My main responsibilities included building and integrating APIs, developing responsive user interfaces, and managing database operations. I also collaborated with the development team to debug issues, improve application performance, and implement new features.

Developers Hub Corporation – Rawalpindi, Pakistan

MERN Stack Developer

[15/04/2024 – Current]

I am currently working at **Developers Hub Corporation** as a **Full Stack (MERN) Developer**. In this role, I develop and maintain scalable web applications using technologies such as **MongoDB, Express.js, React.js, Node.js, Next.js, TypeScript, and PostgreSQL**. My responsibilities include designing and implementing RESTful APIs, building responsive and user-friendly interfaces, managing and optimizing database operations, and ensuring overall application performance and scalability. I also collaborate closely with the development team to deliver high-quality features, troubleshoot issues, and continuously improve the product.

SKILLS

React Js / Next Js / Typescript / Node Js / Express Js / MongoDB / Git / Github / MySQL / Postgresql / Postman / JavaScript / Bootstrap / Tailwind

PROJECTS

Shopping Store

- Developed a full-stack web store using **React (Vite) for frontend** and **Node.js + Express with MongoDB for backend**.
- Implemented **JWT-based authentication** and secure API communication between frontend and backend.
- Built complete **product, cart, and order management system** with dynamic pagination and filtering.
- Integrated **Stripe Checkout with webhooks** to handle secure online payments and automatic order status updates.
- Used **Cloudinary** for image upload and storage, loading images via CDN URLs for better performance.
- Deployed frontend on **Vercel** and backend on **Render** with automatic deployment on Git commits.

Nexus (Investor & Entrepreneur Collaboration Platform)

- Developed a **full-stack MERN platform** enabling investors to discover startups and send collaboration requests.
- Implemented **JWT authentication and role-based access control** for investors and entrepreneurs.
- Built **REST APIs and dynamic dashboards** using React, TypeScript, and Express.js.
- Integrated **MongoDB Atlas** for user and collaboration request data management.
- Implemented **request lifecycle system** (pending, accepted, rejected).
- Created **reusable React components and responsive UI** with Tailwind CSS.

Link: https://nexus-iota-five.vercel.app/

AI Email Support Tool

- Built an **AI-powered email support dashboard** using React, Node.js, and MongoDB.
- Integrated **IMAP** to fetch incoming emails automatically into the dashboard.
- Implemented **AI reply generation using OpenAI API** for faster customer responses.
- Developed **role-based authentication (Admin & Employee) using JWT**.
- Added **SMTP email sending via Nodemailer** directly from the dashboard.
- Deployed the application on **Netlify (frontend) and Render (backend)**.
