MUHAMMAD RIZWAN

Full Stack Developer (MERN | C#/.NET)

Rawalpindi, Pakistan | +92 342 7524477 | Rizwanchaudhary4477@gmail.com | Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years building and shipping production applications using the MERN stack and Next.js. Delivered e-commerce, education, and AI-powered platforms end to end, from database design and API development through deployment. Also build desktop applications in C# and WPF, including a hospital cafe management system with ML-based sales forecasting that is currently in active use, and a personal HR payroll project featuring ML-based anomaly detection. Comfortable working across the stack and picking up whatever the problem needs.

TECHNICAL SKILLS

Core Stack (Web Development): React.js, Next.js, JavaScript (ES6), TypeScript, Node.js, Express.js, NestJS, MongoDB, PostgreSQL, MySQL, Tailwind CSS, RESTful API Design

Desktop & ML: C#, WPF, XAML, Entity Framework Core, ML.NET

Mobile: React Native

Tools: Git, GitHub, Postman, Agile Collaboration, Code Review

WORK EXPERIENCE

Full Stack Developer | Primze Tech *Nov 2025 - Present*

- Independently own full features from requirement to deployment, building web applications end to end using React.js, Next.js, Node.js, Express.js, MongoDB, and PostgreSQL.
- Design and integrate RESTful APIs connecting frontend interfaces to backend services and databases.
- Build and maintain cross-platform solutions combining the web stack with C# and SQLite for desktop-based requirements.
- Fix bugs and maintain existing codebases alongside new feature development, following established code review practices.

Full Stack Developer | SLYK Design Studio *Feb 2024 - Oct 2025*

- Independently delivered full-stack client projects end to end using MongoDB, Express.js, React.js, Node.js, Next.js, TypeScript, and PostgreSQL.
- Designed and built RESTful APIs and responsive user interfaces from initial requirements through deployment.
- Identified and resolved performance bottlenecks in database queries and application logic to improve stability.
- Coordinated directly with the development team to plan features, debug production issues, and meet delivery timelines.

MERN Stack Developer (Internship) | Alright Private Tech Limited *Aug 2023 - Dec 2023*

- Built and integrated REST APIs and developed responsive UI components using the MERN stack under senior developer guidance.
- Managed database operations and collaborated with the team to debug issues and implement new features.

KEY PROJECTS

AI Email Support Tool | Live Demo

- Built an AI-powered customer support system using React, Node.js, and MongoDB, integrating the OpenAI API for context-aware automated email replies via IMAP and SMTP.
- Implemented role-based JWT authentication for Admin and Employee accounts, and deployed the application on cPanel.

E-Commerce Web Application | Live Demo

- Built a full-stack online store using React, Node.js, Express, and MongoDB, with JWT authentication, product and order management, and Stripe payment integration.
- Handled image uploads through Cloudinary, and deployed the frontend on Vercel with the backend on Render using an automated deployment workflow.

UniJump - International Education Platform | Live Demo

- Built a Next.js and MongoDB platform for international student applications, with separate dashboards for admins and clients.
- Implemented document upload, application status tracking, and approval workflows for staff managing submissions and payments.

Furr & Feathers - Pet Store Platform | Live Demo

- Built a full-stack pet store platform in Next.js and Node.js selling pet food, medicine, and supplies, with guest and logged-in checkout, product ratings and reviews, and cash-on-delivery or advance payment options.
- Built a role-based admin panel for managing orders, products, and inventory.

Premium Rental Car - Car Rental Platform | Live Demo

- Built a car rental platform in React with a Node.js backend, featuring luxury, family, and sports vehicles available on a 24-hour rental basis with online booking and payment.
- Built an admin dashboard for managing drivers, car availability, and booking schedules.

HR & Payroll Management System | GitHub

- Built an enterprise-style desktop HR and payroll system in C# and WPF, covering employee records, attendance, leave management, loan tracking, and performance appraisals, with Pakistan FBR tax slab payroll calculations and automated salary slip generation.
- Implemented five ML.NET features including employee attrition prediction, payroll anomaly detection, and attendance pattern analysis.
- Personal project built to strengthen desktop application and applied ML skills alongside primary web development work.

Hospital Cafe Ledger - Desktop Cafe Management System | GitHub

- Built an offline desktop application in C#, WPF, and SQLite (Entity Framework Core) for hospital cafe management, including doctor accounts, real-time billing, and a wallet-based payment system.
- Integrated ML.NET for sales forecasting, balance warnings, and peak-hour detection, along with CSV report export and database backup and restore.
- Runs on Windows with no installation required, and is currently in active use at a hospital cafe handling real daily transactions.

EDUCATION

BS Computer Science | PMAS Arid Agriculture University, Rawalpindi

Oct 2020 - Aug 2024

Final Year Project: Lingo Learn, an Android language-learning app (Kotlin, XML) with real-time multilingual chat, interactive quizzes, and user progress tracking.

CGPA: 3.24/4.0

CERTIFICATIONS

Web Development - Coursera (Vanderbilt University)

MERN Stack Development - Apna College
